South Africa	0 - 10	14.10	7.05	10 - 17 business days

IMPORTANT

- If the volumetric weight ($L * W * H / 6000$) is greater than the actual weight of the package, the shipping price will need to be calculated based on the volumetric weight.
- Fuel Surcharge is calculated on top of the quoted pricing above and changes every month. Monthly fuel surcharge fee can be found at the following link:
<https://dpex.com/Information?type=Fuel-Surcharge>
- For the packages that are shipped to Dubai we're required to add 5% VAT.

A few things to keep in mind

1. The minimum weight for any shipment is 500 grams.
2. If you need to ship more than 10kg by DPEX, please get in touch with us for pricing.
3. **SIZE RESTRICTIONS:** Any side of the package should be less than 1.50 meters. Additionally, the sum of the length, width and height should be less than 2 meters ($l + w + h \leq 3m$). If you need to ship package that exceeds these restrictions, please contact us.
4. Products that contain batteries cannot be shipped using this service.
5. All orders placed before 5pm China time will be shipped by the end of the next business day.
6. DPEX could change their pricing at any time. We'll update you ASAP if/when they change their pricing.
7. We support shipping via many other carriers as well, including DHL and TNT/FedEx, when you need to ship a package faster or if you need to ship to a country that's not included in the list above.
8. Our primary warehouse is in Chengdu. We're now ramping up a new warehouse in Shenzhen as well.

Packing and Shipping

The same additional fees apply for DPEX Express shipping as for any other shipping solution with us. Please refer to the Quotation for these fees.

Let's say the package weighs up to 500 gr, and needs to be shipped to the Philippines. According to the table above, that costs \$10.32. You then need to add the fuel surcharge on top of this price. For October 2018, the fuel surcharge is 16.75%, so your total price is:

$$\text{\$10.32} \times (1 + 0.1675) = \text{\$12.05}$$

In this case, your total price for picking, packing and shipping will be:

$$\text{\$12.05} + 1.45 = \text{\$13.50}$$

Let's take a second example. Let's say your product weighs 750gr. As DPEX charges for every 500gr, they will bill you for 1kg instead of 500gr. In this case, your price will be:

$$\text{\$10.32} + (1000 - 500) / 500 \times \$3.61 = \text{\$13.93}$$

You will then need to add the fuel surcharge, making your total price for shipping:

$$\text{\$13.93} \times (1 + 0.1675) = \text{\$16.26}$$

Finally, your total price for picking, packing and shipping in this example will be: $\text{\$1.45} + \text{\$16.26} = \text{\$17.71}$

You're billed for packing and shipping on a weekly basis, as well. Every Tuesday, we'll bill you the total cost of all your orders over the previous Monday to Sunday.
